

Title: Docker Solutions Architect
Reports To: Director, Cloud Consulting

CleanSlate is a cloud consulting and software asset management company that uses technology solutions to make our clients great. We are looking to add a **Docker Solutions Architect** to our team. If you are passionate about developing quality solutions and thrive in a fast paced, forward-thinking environment, then this could be the ideal opportunity for you. Because we are a small team, the expectation is that you will bring your experience as a strength. You will work independently but will have a team of high performers to lean on when necessary.

The Solutions Architect for CleanSlate Consulting initiatives provides the opportunity to change the world of software development for one of the fastest growing container application platforms in the industry. By applying your architecture experience in a Docker environment, you will support and enable successful adoption of the Docker platform, working directly with our top enterprise customers. You will work collaboratively with our Sales, and Enterprise Application Consulting Services teams and will serve as an advocate for our customers. This position provides technical guidance and support through the entire implementation and adoption of Docker.

If you feel you are a fit for our team and have the technical experience required, please email your resume!
Jan.Mewhinney@CleanSlateTG.com

We are looking for strong experience with the following:

- Working onsite with strategic, enterprise class customers, delivering solutions architecture consulting, technical guidance, knowledge transfer and establish “trusted advisor status”
- Leading proof of concept and pilot implementations of the Docker platform within key customer accounts
- Presenting Docker platform strategy, concepts, and roadmap to technical leaders with the customer’s organization
- Helping enabling customer technical resources to develop service delivery skills through mentorship, training, engagement shadowing etc.
- Helping propagate skills and experience through development of repeatable assets (methodologies, blueprints, tools, white papers, knowledge articles etc.)

Minimum Qualifications:

- 8+ years of consultative customer-facing architecture and post-sales experience
- BS degree in Computer Science, Mathematics, Engineering or equivalent professional experience
- Experience with the virtualization and cloud services (VMWare, AWS, Azure, GCP, Digital Ocean etc)
- Familiarity with Linux and/or Windows architecture and tools
- Understanding of key DevOps concepts and tools (automation, continuous integration and continuous deployment(CICD), configuration management, serverless architecture)
- Experience with key web, networking, storage, security protocols (HTTP(S), TCP/IP, DNS, SSL/TLS, AD/LDAP, NFS, SAN, NAS..etc)
- Presentation skills with a high degree of comfort speaking with executives, IT Management, and developers

What we have to offer:

- Solid benefits including medical, dental and 401k
- Unlimited PTO
- Fun work environment
- Competitive salary
- Paid technical training and certification
