

Title: Test Automation Engineer

CleanSlate is a cloud consulting and software asset management company that uses technology solutions to make our clients great. We are looking to add Test Automation Engineers to our team. If you are passionate about developing quality solutions and thrive in a fast paced, forward-thinking environment, then this could be the ideal opportunity for you. Because we are a small team, the expectation is that you will bring your experience with automated testing frameworks, including but not limited to unit, functional, api, integration, performance, and load testing as a strength. You will work independently but will have a team of high performers to lean on when necessary.

Your charge will be in providing a way to ensure quality of these applications while being able to release new versions of the applications at will. You will play an essential role in allowing applications to grow, scale, and remain highly available. You will work closely with Development, Architecture, and Platform teams to ensure high quality and feature-rich applications.

If you feel you are a fit for our team and have the technical experience required, please email us your resume! TalentAcquisition@CleanSlateTG.com

About the job

- Build fully automatable testing applications
- Work with DevOps team to deploy and enable various testing frameworks within CI/CD pipelines
- Work with architecture and development teams to design and develop impactful testing frameworks for new applications, components, and integrations
- Research and evaluate new automated testing strategies
- Embody the core values of Agile to deliver quality software to our users
- Build effective performance and load testing applications to identify any scalability issues and test system endurance and capacity

You should have

- Hands on experience working with automation frameworks
- Knowledge of continuous integration and delivery practices and technology
- Understanding of object-oriented development concepts and practices
- Experience working with SOAP and REST services
- Solid knowledge of SQL and relational database concepts
- Experience working in an Agile/Scrum development environment
- Understanding of testing concepts and principles

Other Helpful skills

- Experience with VSTS or TFS / Azure DevOps
- AWS cloud experience

- Web and Load Test applications
- Selenium
- Rest Assured
- Junit
- SonarCube
- Jasmine
- Karma
- TSLint

What we have to offer:

- Solid benefits including medical, dental and 401k
- Unlimited PTO
- Fun work environment
- Competitive salary
- Paid technical training and certification

CleanSlate is an equal opportunity employer, and we value diversity at our company. We don't discriminate on the basis of race, religion, color, national origin, gender, sexual orientation, age, marital status, veteran status, or disability status.
