

About CleanSlate

Founded in 2000, CleanSlate Technology Group is an Indianapolis-based IT consultancy uniquely equipped to build new cloud-native applications and modernize complex legacy applications. CleanSlate specializes in full-service modernization around Application Development, DevOps and Cloud Architecture. Our team is full of passionate and highly skilled cloud technologists that are empowered to solve complex problems every day, collaborating on great technical solutions that impact our customers' success.

Senior Azure Architect (Infrastructure)

Job Summary

This position is responsible for designing and delivering modern cloud infrastructure solutions focused primarily on Microsoft Azure. The ideal candidate has several years' experience working with Azure cloud services building highly available, secure, globally accessible cloud platforms. A deep understanding of the Microsoft stack is desired. Candidate must thrive in a fast paced, forward-thinking work environment. Must be skilled in all phases of delivery, including requirements gathering, design, development, and testing. Also, candidate must be able to lead others on implementation efforts, encouraging collaboration and teamwork to execute and drive results for CleanSlate clients.

This is a full-time, salaried position that can be 100% remote.

As part of the CleanSlate Cloud Practice you will have the work closely with CleanSlate and our Clients to deliver enterprise solutions.

- Collaborate and provide technical leadership to clients to leverage cloud services within our strategic Enterprise accounts.
- Represent CleanSlate in face-to-face client meetings and drive the overall technical direction for the client.
- Advise and consult on Azure and AWS Cloud service implementations and patterns to advance clients in cloud technology adoption for application modernization.
- Maintain client relationships and represent CleanSlate as a thought leader for scalable next-generation cloud architecture, migrations, and applications.
- Design and deploy highly available cloud tenants and implementations utilizing state of the art cloud services.
- Lead implementation team to deliver projects to clients.
- Learn, share knowledge, and mentor other CleanSlate team members on new skills.
- Independently research emerging cloud services and capabilities. Provide insight to clients on the latest cloud architectures, technology, solutions, and industry trends

Responsibilities

- Lead team to deliver hybrid and cloud-based solutions. Lead team to design and build modern cloud tenants.
- Lead all phases of delivery lifecycle.
- Work closely with client to understand the business requirements. Drive the analysis and design the technical solutions in compliance with architectural blueprints and technology strategy
- Build complex architectures to support applications.
- Embrace agile delivery processes and influence adoption of Infrastructure as Code (IaC). Utilize coding techniques and tooling (such as Terraform) to ensure state is consistent.
- Ensure DevOps methodologies and automation are leveraged as required by project and/or client.
- Advise on infrastructure architecture, ensuring cloud infrastructure meet needs of application.
- Interact with clients during presales or consultancy roles, including interactions with senior level client personnel
- Provide input and estimates to create proposals.

Educational Requirements and Qualifications

- 7 years experience working with Microsoft Applications and Infrastructure
- 3 years of experience in the overall design and implementation of cloud solutions
- 2 years of experience designing and documenting cloud architectures
- 3 years hands on experience with Azure cloud solutions
- 2 years of experience with IaC implementations
- Experience in facilitating design and working sessions with clients and technical teams
- Demonstrated experience designing and implementing Identity and Access Management as well as security architecture and best practices
- Hands on experience with cloud compute, storage, and network services
- Hands on experience with containerization and container orchestration
- Hands on experience managing, operating, and troubleshooting cloud services
- Hands on experience planning and migrating workloads to cloud platforms
- Strong oral and written communication skills interacting with a variety of audiences (Architects and technical implementers, and developers)
- Bachelor's Degree or equivalent experience

Preferred Qualifications

- 2 years' experience in a client-facing, sales-aligned advisory role such as a Consultant or Engineer
- Completed Azure certifications
- Experience with Azure DevOps

Experience with cloud methodologies, frameworks, automation, and industry leading trends
