DEVOPS - **CLOUD INFRASTRUCTURE ARCHITECT** | CleanSlate

CleanSlate Technology Group (CSTG) is a leading multi-cloud technology consulting firm specializing in building modern applications and products that move businesses forward. From custom cloud-native application development to modernized legacy systems, we develop and deploy solutions that deliver greater agility, faster speed to innovation, and more resiliency to handle whatever the future brings. We're a team of multi-cloud natives with certifications across AWS and Azure; helping our customers solve their business problems with a modern cloud approach. At CSTG, we believe that when you combine the power of technology with brilliant ideas, the sky's the limit.

WHAT DOES YOUR TEAM LOOK LIKE:

Our Cloud Delivery team helps to provide advisory, architectural, and implementations for our customers and helps drive their cloud journey. We are solution-driven technologists that have a passion for solving our customers' challenges with cutting-edge technologies. Our team members need to be constantly curious and unparalleled problem solvers to tackle the exciting and complex work our clients bring to us.

WHAT DOES YOUR ROLE LOOK LIKE:

Are you passionate about building cloud-based solutions and thriving in a fast-paced environment? Do you enjoy solving problems?

The ideal team member for CSTG is someone who can deliver technical solutions in a modern way while leveraging cloud-native development and having a passion for building applications. The primary focus of a Cloud Infrastructure Architect is to help our clients build reliable, performant, and scalable solutions to help drive our customers' business forward.

- Experience in designing and implementing enterprise cloud solutions (AWS or Azure)
- Build automation into cloud solutions with automated deployment & configuration of infrastructure and experience in tools to build that cloud foundation
- Experience with programming languages such as Shell, Python, Ruby, Perl, Java, C, C++, and C# or equivalent
- Experience in Infrastructure as Code (IaC) with tools like AWS or Azure specific tooling or Terraform
- Demonstrated experience designing and implementing Identity and Access Management, Security Architecture, and best practices
- Hands-on experience with cloud computing, storage, and network services
- Hands-on experience with containerization and container orchestration
- Experience in Cloud Networking and Security with AWS or Azure-specific tooling (Encryption, Gateway, SSO, etc)
- Ability to work in serverless computing with AWS or Azure-specific tooling and Container tooling
- You are a life-long learner, enjoy new challenges, and have a creator mindset

If you feel like you are a fit for our team and have the technical experience required, please email your resume to TalentAcquisition@cleanslatetg.com
