

CleanSlate Technology Group (CSTG) is a leading multi-cloud technology consulting firm specializing in building modern applications and products that move businesses forward. From custom cloud-native application development to modernized legacy systems, we develop and deploy solutions that deliver greater agility, faster speed to innovation, and more resiliency to handle whatever the future brings. We're a team of multi-cloud natives with certifications across AWS and Azure; helping our customers solve their business problems with a modern cloud approach. At CSTG, we believe that when you combine the power of technology with brilliant ideas, the sky's the limit.

WHAT DOES YOUR TEAM LOOK LIKE:

Our Cloud Delivery team helps to provide advisory, architectural, and implementations for our customers and helps drive their cloud journey. We are solution-driven technologists that have a passion for solving our customers' challenges with cutting-edge technologies. Our team members need to be constantly curious and unparalleled problem solvers to tackle the exciting and complex work our clients bring to us.

WHAT DOES YOUR ROLE LOOK LIKE:

Are you passionate about building cloud-based solutions and thriving in a fast-paced environment? Do you enjoy solving problems?

The ideal team member for CSTG is someone who can deliver technical solutions in a modern way while leveraging cloud-native development and having a passion for building applications. The primary focus of a Front End Developer is to help our clients build reliable, performant, and scalable solutions to help drive our customers' business forward.

- Experience with NodeJs Applications
- Experience with React Native, GraphQL, or NativeBase
- Experience with AWS or Azure Platforms
- Experience with Webpack configuration
- Understanding of mobile applications
- Strong understanding of browser rendering behavior and performance
- Strong understanding of cross-browser compatibility issues and workarounds
- Strong understanding of HTML5 and CSS3
- Strong understanding of JavaScript and TypeScript
- Familiarity with JavaScript TDD compatible testing frameworks like Jest
- Proficient understanding of code versioning tools, such as git

If you feel like you are a fit for our team and have the technical experience required, please email your resume to TalentAcquisition@cleanslatetg.com
